BRIDGE2AI

Designing and Implementing Effective Communication Plans for Impactful Team Science

February 13th, 2026
B2AI Teaming Workshop

Jamie Toghranegar, SLPD, CCC-SLP

Assistant Professor, Department of Otolaryngology HNS
Lead of Simulation, Institute for Voice and Hearing Innovation
Lead Project Manager, Bridge2AI-Voice
University of South Florida

A few words about me...

- Born and raised in Fishers, Indiana
- Bachelors: University of Florida
- Master of Science in Speech Language Pathology: Florida Atlantic University
- Doctorate in Speech Language Pathology: Northwestern University
- Currently a candidate for a Master of Science in Artificial Intelligence at the University of South Florida
- Practiced for over 10 years clinically as a Speech Pathologist
- Joined B2AI two years ago as project manager for B2AI-Voice

Today's Objectives

- **Part 1: The Basics of Effective Communication**
 - Practical strategies to be an effective communicator
 - Running an effective meeting
- **Part 2: Designing and Implementing Communication Architectures for Team Science**
- **Part 3: Apply what you've learned:** Developing your own Communication Charter

Part 1: The Basics of Effective Communication:

Practical Strategies to be an Effective Communicator

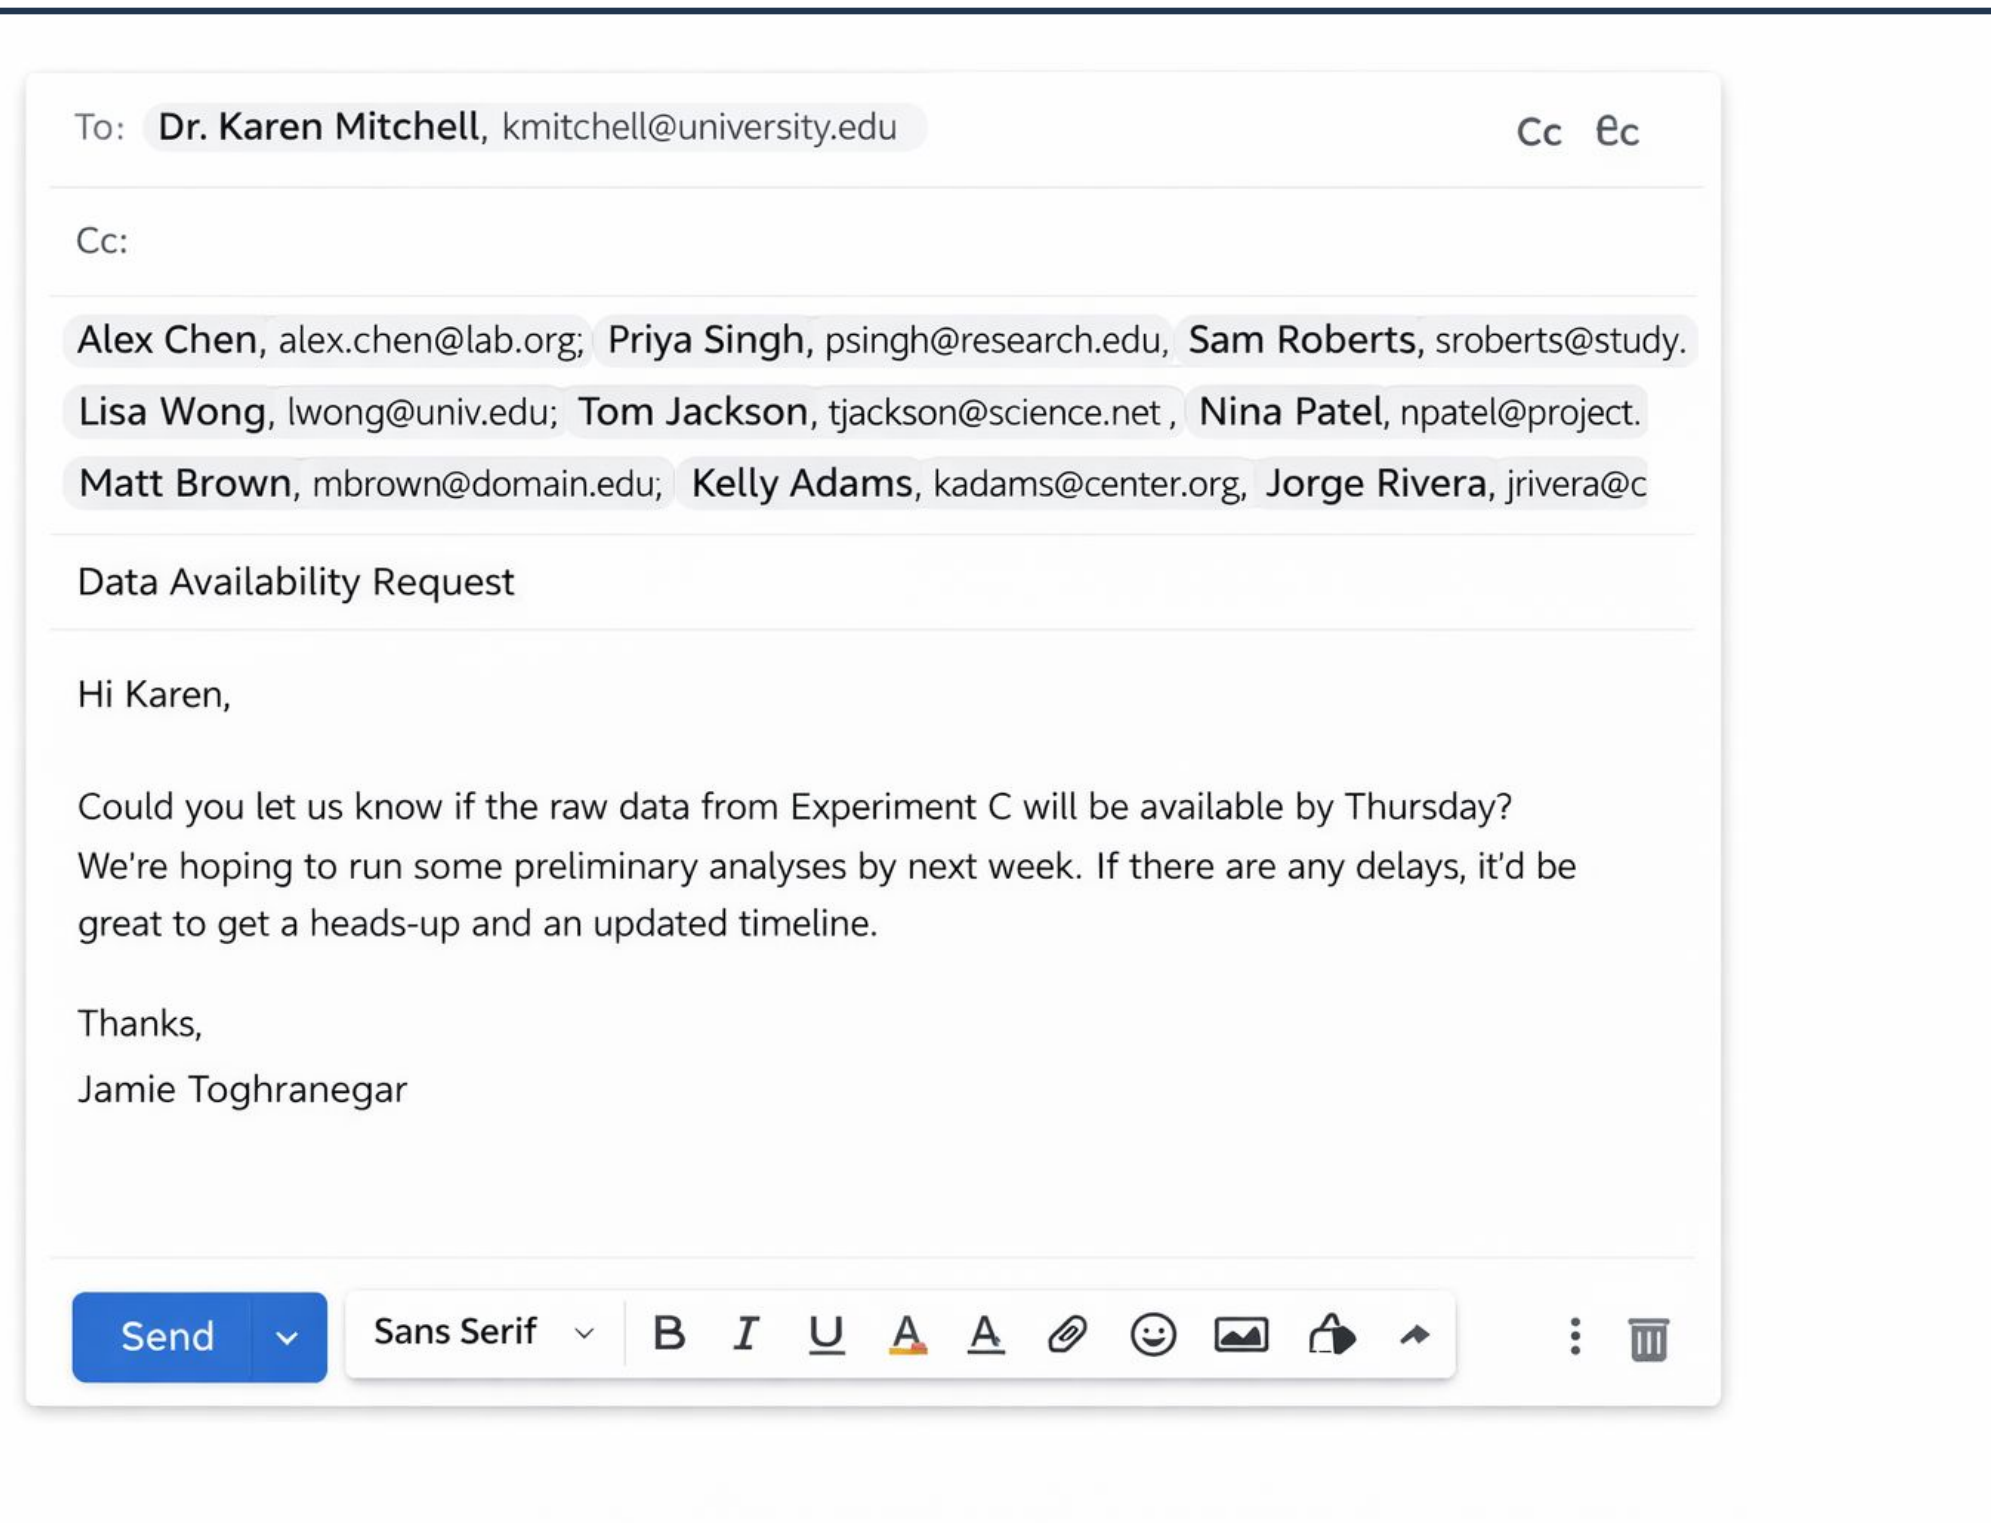

What is communication?

What is communication?

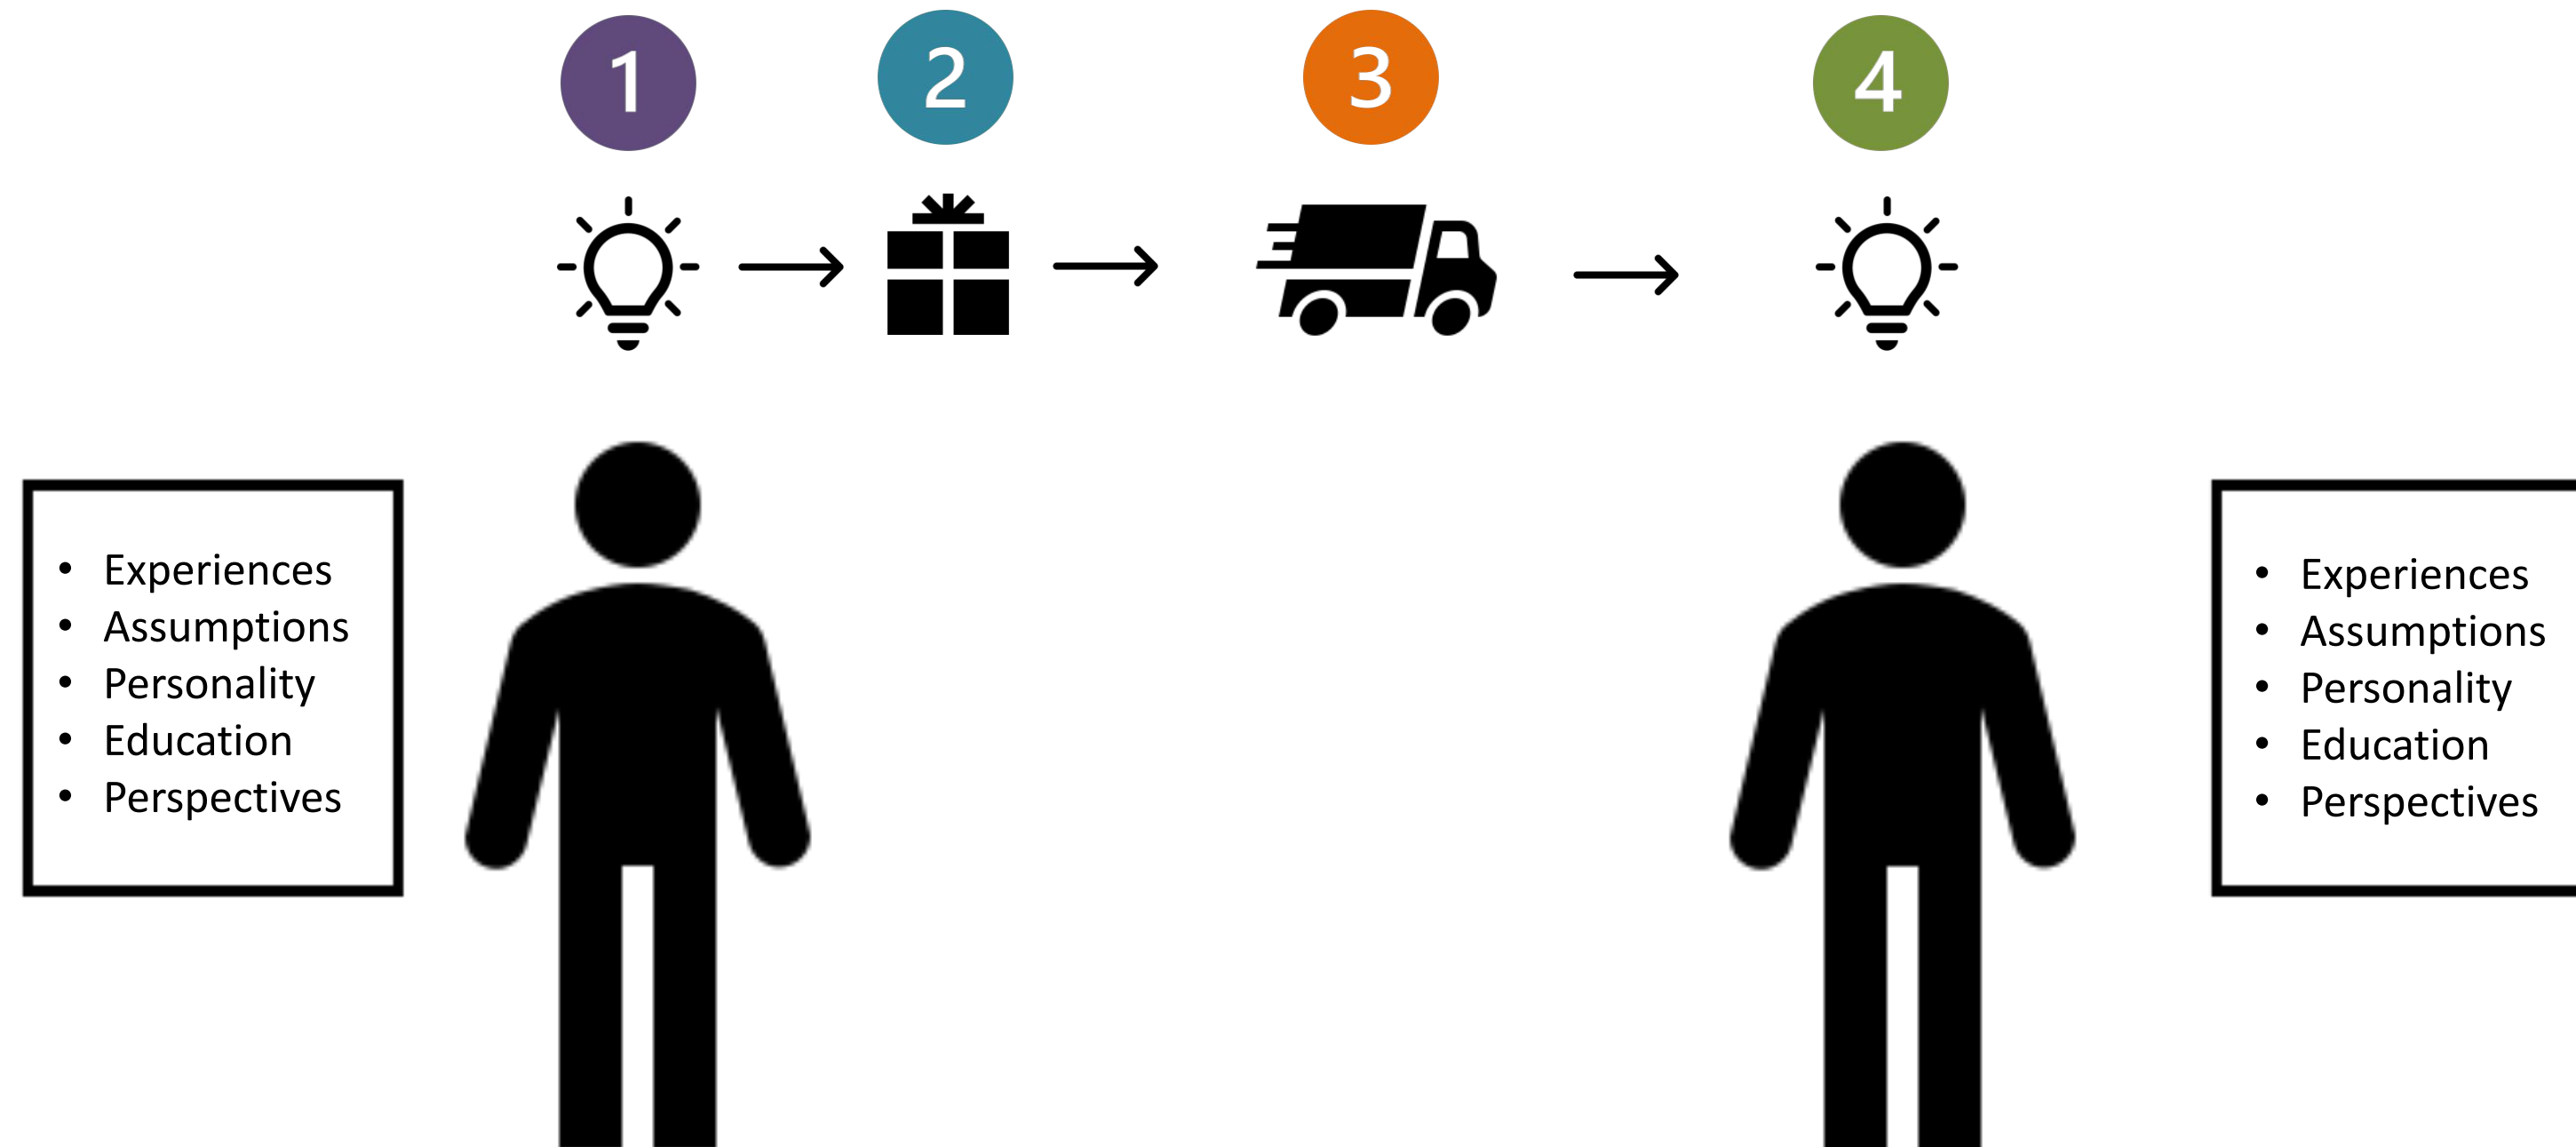

What is communication?

The Communication Chain

The Message

1

Idea

Need/want

Question

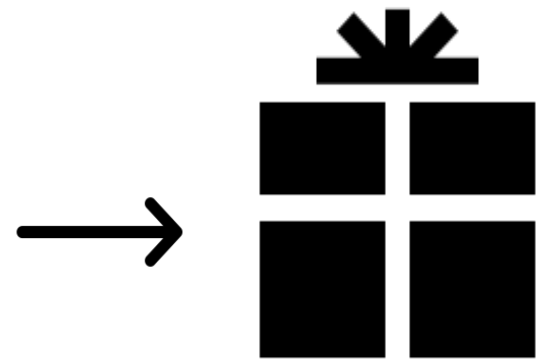

Request

Express Opinion

Express feeling

The Presentation

2

You intuitively make decisions on how to present **the content** of your message

Tip: Consider both *the nature of your message*, and the *perspective of the recipient* (mismatches can result in communication breakdown)

Presenting the Message

Communication Channels: Delivering the Message

3

You then make decisions regarding the communication channel

Tip: consider the nature of the message, preferences of the recipient, and your intended outcome or desired response (mismatches can result in communication breakdown)

Communication Channels: Delivering the Message

What are the communication channels available to you?
This will form the backbone of your team's communication architecture

1:1 Conversation

Small Group Meetings

Text Messages/Chats

Email

Project Management Platform

Large Group Meetings

Steering Committees

Newsletters

Scenario Practice

Effective or not? If not, is there misalignment in  presentation or  delivery?

Hi all,

I uploaded a draft—let me know what you think.

Best,
Jamie

Scenario Practice

Effective or not? If not, is there misalignment in presentation or delivery?

Hi team,

I wanted to share a few thoughts and questions about our current plans for remote data collection and get your feedback before we move further down this path.

Overall, I think the remote approach makes a lot of sense given our timelines and resource constraints, and I appreciate the work that's already gone into adapting the protocol. That said, I've been thinking about a few potential challenges and tradeoffs that might be worth discussing as a group, especially as they relate to data quality and participant experience.

One concern I have is variability in participants' technical setups. Differences in devices, internet stability, and levels of comfort with the platform could introduce noise that's hard to quantify. I'm wondering whether we should build in additional checks or documentation (e.g., brief post-session questions) to help us interpret the data later.

I'm also curious about how others are thinking about engagement and fatigue in a fully remote setting. Without an in-person facilitator, it may be harder to tell when participants are confused or disengaged, and I'm not sure whether our current instructions and timing fully account for that. Do folks think we should pilot a slightly shorter session or add more structured pauses? Finally, from an ethics and accessibility standpoint, I'd love to hear thoughts on whether remote participation meaningfully lowers barriers for our target population, or whether it might unintentionally exclude some groups. If anyone has experience or data from similar studies, that perspective would be really helpful.

Thanks for reading and looking forward to your thoughts,

Jamie

Part 1: The Basics of Effective Communication:

Running an Effective Meeting

How to: Effective Meetings

How to run an effective meeting

Step 1: Make sure meeting is the best delivery format

Step 2: What is the purpose of your meeting?

Step 3: Have a clear agenda with time allocation

Step 4: Have running notes

Step 5: Have clear action items

Step 6: Have regular cadence, send before and after emails

How to: Effective Meetings

Anatomy of a Meeting Agenda

Meeting Title

Meeting Date

Individuals in Attendance

1. Action Items from Previous Meeting

|

2. Agenda items

- Item 1 (10 minutes)
- Item 2 (5 minutes)

3. Action Items for Next Time

How to: Effective Meetings

Follow-Up Email

Good Afternoon,

Thank you for attending today's meeting. We had a very productive conversation and the plan for the P50!

[Agenda and notes](#)

Action Items

- Yael to speak to Dr. Mifsud about cross appts for Ruth, Terry, Michelle, David Williams, Sang-Hei, and Sudeep (John already requested)

How to: Effective Meetings

Reminder Email

Good morning,

Please be reminded of tomorrow's Team Leads meeting. As we prepare for raw voice data release, the Ethics team will be providing a presentation to walk us through how people we gain access to the data using SageBionetworks

Agenda

ESS on deck

2/27 Teaming Jamie/Yael

3/13 Standards Alistair/Satra

Action item review

- Cindy to follow up with Brian McWeeney to talk to leadership about exp with Talk Bank and Dementia Bank – confirmed for March
- Cindy to reach out to ethics about presenting at the next meeting - DONE

Part 2: Designing and Implementing Communication Architectures for Team Science

Communication at the Team-Level

What is a Communication *Architecture*?

How you **design** your communication roles, processes, methods, and workflow

What is a Communication *Charter*?

A **written** communication plan to define your communication processes, platforms, and roles

Communication at the Team-Level

Communication Channels

- Microsoft Outlook
- Box
- Monday.com
- Slack
- Whatsapp
- Phone calls/text
- Google docs
- Teams messages

Meetings

- PI meetings
- Data Release Taskforce
- Symposium Planning Meetings
- Hackathon Planning Meetings
- Summer School Meetings
- Data Acquisition Meeting
- Data Collector Meetings

Communication at the Team-Level

The Communication Charter: What it Contains

1. Identify shared purpose, mission of team
2. Identify Roles and Individuals (who is involved?)
3. What are your communication goals?
 - Identify preferences of team
4. Name communication processes
5. Identify communication channels for each process
6. Determine cadence
7. How will decisions be made?
8. Personal preferences
9. Managing Conflict
10. How to revise and edit as needed

Communication at the Team-Level

The Communication Charter: How to Write it

1. **Could be completed in one meeting**, may require several depending on the team preferences and size
2. **Get to know your team members**
3. Understand their **motivations** and incentives
4. Understand the **digital platforms** and processes they already utilize

Communication Basics at the Team-Level

Considerations when designing team-level communication architectures:

1. **Think big picture:** How can you get communication to all team members efficiently
2. **Digital platforms & communication channels**
 - What are people actually using?
 - **Simplify!** Less is more
3. How will work **cadence** be established? (probably meetings!)

Part 3: Apply What You've Learned:

Developing your own Communication Charter

How to: Communication Charters

Scenarios:

1. **Small research team** at a single university
2. **Large multidisciplinary research team** at multiple universities
3. **Large complex consortium** with multiple initiatives, projects, researchers, and institutions that must align on shared objectives
4. **Use your own scenario** that you are currently part of

You have 15 minutes!

Thank you!
